

# THE LEGACY SPECTRUM

## The Values We Hope To Pass On

Our “legacy” is not simply the money we leave to non-profit organizations in our community. We believe that our greatest legacy is our children and the impact that they will have on making this world a better place to live. Through both example and the efforts we have made in the past and will make during our family meetings, we hope to pass on our values

*Check five or six of the following values that are important to you and write your comments describing how you interpret each value and/or how you want your children to live them out.*
